The action of the play takes place in a London flat in the Regency Park Section. The story evolves around a wealthy English couple and their adopted son. As the play opens it is apparent that something has happened in the flat which the Nedlows are trying to cover up. The boy Martin confides to his father's secretary that his adopted parents are just keeping up a front with all their social chatter and affectations.

A tutor is hired to help Martin get through his law course and the man turns out to be something more than a tutor. He becomes a very central part of the Nedlow household before the play is over. His name is Mr. Fenn and this part is played by Harold Gay.

Mr. Gay gives the part just the right amount of subtle mystery and intrigue in his interpretation of the lines. The Nedlows almost succeed in making themselves believe what they want to believe, until Mr. Fenn arrives on the scene and upsets the apple cart.

The Middleboro Little Theatre Group has been in existence seventeen years, producing two or three plays a year since its beginning. The first play done by the group was "Arsenic and Old Lace", and they have kept up a high standard of play selection ever since. Membership stays at about 40 with a patron subscription list. The patron membership was started just this year.

A very fine production staff works with the players and these people have built up a reputation of building excellent sets. Mrs. Donald Clay allows the use of her cellar for building sets, and Lawrence Osborne of Middleboro, builder; and Thomas Richards, a student at Mass. Art in Boston, with Mrs. Clay make a wonderful team.

L.T.G. has members from surrounding towns. In fact, in the cast of "Someone Waiting" three are from Taunton, one from Brockton and one from Lakeville. The other four are from Middleboro.

Harold Gay has been a member of L.T.G. for several years now and is president of the group at present. He has taken part in at least three major productions. The part of Mr. Fenn in "Someone Waiting" is his most demanding role to date. His portrayal of the alcoholic son of the wealthy family in "Holiday" practically stole the show.

The production is being directed by Mrs. Kenneth Keedwell of Middleboro.

Serving on the Ways and Means committee of the Old Rochester Teachers' Association are Mrs. Richard H. Blasdale, chairman; Miss Etta Hix Allen, Mrs. Chester Downing, Miss Pauline Bockman and Mrs. Weldon C. Riddell.

The publicity committee is comprised of Mrs. Dorothy Bonnar, Miss Priscilla Leggee,

CANCER PROGRESS YEAR

The American Cancer Society and the National Cancer Institute have designated 1962 as Cancer Progress Year in an effort to point up the advances made against cancer in the last 25 years.

While they cannot offer anything as spectacular as the man in space science has given use, they can show, in human terms, dramatic and remarkable results. Twenty-five years ago about 160,000 persons were alive, cured of cancer. Today there are more than 1,100,000. The number is increasing each day.

The cure rate for cancer climbed from one out of seven in the late 1930's to one out of three in the late 1950's. Today, according to the Society, it could be one out of two if all cancers were diagnosed early and treated promptly.

While the final conquest of cancer is not in sight, the Society and the Institute can take great satisfaction in their uphill struggle. In 1962 some 42,000 men, women and children will be saved from cancer who would have died had they developed the disease 10 years ago. This is indeed compelling reason for all to join in observing Cancer Progress Year.

Progress against cancer is attributed to two major factors. First, developments in research which have resulted in new diagnostic techniques and improved methods of treatment. Second, response to public and professional education which has resulted in earlier detection, prompt treatment and better, more available facilities.

Among the goals of Cancer Progress Year are, "to intensify the efforts being made to persuade the public to act for its own protection, to improve the care of the cancer patient, and to step up all programs to speed the final victory over cancer." Final victory will come from the laboratory, and while today we are in the midst of the most massive research attack ever launched against a disease, there is still great need for expanding the cancer research effort.

Dear friends,
Here is a quotation from Gladstone which deserves to be republished:
"Show me the manner in which a nation or community cares for its dead, and I will measure with mathematical exactness the tender sympathies of its people, their respect for the laws of their land, and their loyalty to high ideals."
Under that test, America should stand high.

JONES ANNOUNCEMENT FOR STATE SENATE

State Representative Allan F. Jones (R. Barnstable) has officially announced his candidacy for the State Senate seat of the Cape and Plymouth District.

Rep. Jones, 40, has been a member of the House of Representatives for the past 14 years. Elected in 1948, he was the youngest member of the House at that time. He has served on the powerful Ways and Means Committee, Highways and Motor Vehicles Committee and the Committee on Municipal Finance. At present, he is assistant floor leader and has held this post for the past four years.

Mr. Jones believes the background of his membership in these important committees and his position in leadership provides a solid foundation in understanding the needs of the Senatorial District.

Recently, Rep. Jones visited every town in the Senatorial District discussing the local and state conditions with thousands of residents. He stated he is firmly convinced that "a close personal contact is needed to more effectively keep the wishes of the people before the State Government".

Rep. Jones added: "A continuous effort will be made by me to contact all the voters of the district before the September primaries. The character and history of the shoreline communities make many of the problems confronting a candidate more effectively resolved by this close association. In fact, this can only be done by personal contact, by not only one who lives here, but who also travels among the people constantly."

Rep. Jones emphasized he has always worked closely with the other members of the House from the District and expects to have their approval so that they will continue to work together as a team. This, he said, will create a strong and effective voice from the Cape and Plymouth Senatorial District.

Very few people in this broad land of ours gave it a passing thought or even knew the calamity occurred. On the previous day 99 people met the same horrible death and on the day following 103 had their lives snuffed out in the same way...and again these disasters caused hardly a ripple of national emotion. It happened again today...and will, again tomorrow.

On March 1st 95 Americans met death again in a tearing, screaming crash of metal and the country went into national mourning. Headlines announced it; "specials" on the disasters cancelled regular programming on radio and TV networks; groups everywhere paused for a moment of silence and federal investigators went into action. America's heart went out, as it should, to those unfortunate people and their families.

Why such differing reaction??? The answer is simple...one vehicle was the automobile; the other an airplane.

The horror and tragedy of the plane crash aside, the wide-spread knowledge of the cause of the crash, when discovered, will undoubtedly result in even safer airplane travel... and whether mechanical or human, will be corrected on order from a federal agency.

The carnage on the highways seems to be lumped with "taxes" as being the two things about which we can do nothing. Other than tie up traffic so the curious can look, a fatal accident causes not a ripple on the sea of national complacency...except, of course, on holidays when the guessing game on the number of highway deaths becomes a coast-to coast lottery.

The ALA safety department believes that an

aroused public opinion can accomplish miracles in highway safety just as it has done on many problems throughout history but that shock treatment is necessary to do it. The public must be reminded of the tragedy, the horror, the suffering and the fantastic cost of highway deaths---not just on holiday week-ends, but everyday. They must see the same blazing headlines, the same pictures of torn metal, interviews with eyewitnesses and with bereaved families. In short, fatal accidents on the highways must be treated the same as fatal accidents in airplanes, trains or buses.

When this is done, public opinion will demand an end to the slaughter and, while probably never being entirely eliminated, highway deaths slowly, but surely will decrease.
